The industrial all-in-one that means business – without the clutter.

Built for demanding environments, the Thinvent® Uno 23.8" All in One PC brings desktop-grade performance to a sleek, space-saving design. Whether you're managing a busy reception desk, running a point-of-sale system, or controlling a production line, this machine handles it all with quiet confidence.

Why choose the Uno? It's engineered for continuous operation in tough conditions. The sturdy aluminium alloy and steel construction shrugs off knocks and vibration, while the wide viewing angle and bright 1080p screen ensure crystal-clear visibility from any position – ideal for self-service kiosks or customer-facing displays.

The pop-up camera is a thoughtful touch: keep it hidden for privacy when not in use, then deploy it instantly for video calls or user authentication. Dual-band Wi-Fi keeps you connected without messy cables, and the 12V DC power supply means low energy consumption and safer installation in sensitive areas.

With generous screen space and a fixed stand that won't wobble, the Uno is perfect for fixed workstations where stability matters. The pre-installed Windows 11 IoT Enterprise LTSC provides a secure, long-term platform for embedded applications – no forced updates, no interruptions.

- Save desk space: one cable, one unit, zero compromise.
- Reliable performance for 24/7 use in retail, hospitality, light industrial or logistics.
- Professional aesthetics that enhance your brand environment.
- Backed by Thinvent's proven industrial-grade build quality and global certifications.

Make your next upgrade the last one you'll worry about.
