Power where you need it, form that fits your space.

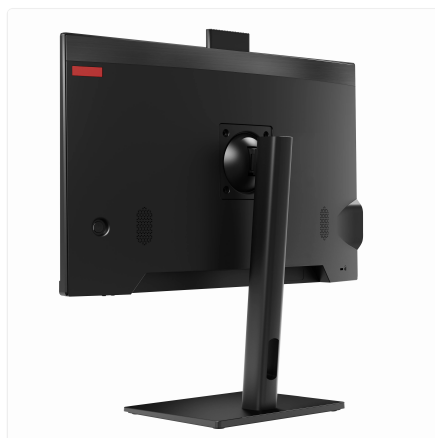

Built for professional environments that demand reliability and elegance, the Thinvent Uno 23.8" All-in-One PC transforms your workspace without cluttering it. Its sleek aluminium and steel chassis hides a powerful AMD Ryzen 5 7430U processor – delivering effortless multitasking for reception desks, retail counters, and control rooms alike.

Why choose the Uno?

- Ergonomic by design: the height-adjustable stand lets you find the perfect viewing angle, reducing neck strain during long shifts. It's a small change that makes a big difference to comfort and productivity.
- Privacy at the push of a button: the pop-up 2-megapixel camera stays hidden until you need it. Ideal for customer-facing areas or shared workspaces where security matters.

- Connectivity that works today and tomorrow: with both VGA and HDMI, you can connect legacy projectors or modern monitors without adapters. Dual-band Wi-Fi keeps you online in busy environments, while Gigabit Ethernet offers a rock-solid backup.
- Built to last: the robust metal construction handles high-traffic settings with ease. Its low-power 12V design stays cool and quiet, so it's just as happy in a shop floor as in an office.
- Your operating system, your way: the system ships with FreeDOS, giving you complete freedom to install Windows, Linux, or any software stack your business relies on. No bloatware, no compromises.

The Thinvent Uno is more than a PC – it's a long-term investment in a workspace that works harder for you.
