Seamless performance where reliability matters most.

Designed for the workspace that never sleeps: the Thinvent Uno 23.8" All-in-One PC puts a powerful AMD Ryzen 5 processor behind a crisp, full-HD screen, turning every transaction, display, and control task into a smooth, responsive experience. Whether it's a busy retail till, an interactive kiosk, or a factory-floor workstation, this machine handles it without fuss.

Built on Thinux™ Embedded Linux, the system boots fast, stays secure, and requires minimal management. No bloatware, no unnecessary updates—just a stable platform that keeps working. Remote administration is a breeze with built-in RDP, VNC shadowing, and browser-based management, so your IT team can support dozens of units from a single desk.

The pop-up 2-megapixel camera keeps your workspace sleek and private, while dual-band WiFi and gigabit Ethernet give you the networking flexibility to fit any layout. Two speakers deliver clear audio for point-of-sale confirmation or multimedia playback, and the pre-installed LibreOffice suite means you can handle documents, spreadsheets, and presentations straight out of the box.

Why choose the Thinvent Uno 23.8"? Because it brings together industrial-grade aluminium construction, a processor that punches above its weight, and an operating system built for longevity—all in one elegant, space-saving design. It's the workhorse that looks the part, ready for years of dependable service in demanding environments.
