Big screen productivity without the desk clutter.

The Thinvent Uno 23.8" All in One brings a full-size 1080p display and serious AMD Ryzen 5 processing together in a single, tidy unit. It is built for people who want a dependable everyday workstation without a tower taking up space.

Who it suits

- Front desks and reception areas that need a clean, professional looking terminal
- Retail billing counters and stock rooms where a large, readable screen speeds up the work
- Back offices handling spreadsheets, billing software and browser based tools all day
- Training rooms and kiosks where a fixed, tamper resistant setup is preferred
- Anyone replacing an ageing desktop with something simpler to deploy and support

Why choose it

- The AMD Ryzen 5 7530U with six cores keeps everyday business software responsive, even with several programs open at once
- A 23.8 inch full HD panel with wide viewing angles means staff and customers can both read the screen comfortably
- Windows 11 IoT Enterprise LTSC gives you a stable, long term platform that is not disrupted by constant feature changes
- Wired networking and no built in WiFi make it a good fit for controlled environments where connectivity is managed deliberately
- The pop up camera is there when you need it and discreetly out of sight when you do not
- A Kensington lock point and fixed stand help keep the unit where it belongs
- Aluminium alloy, steel and ABS housing stands up to daily commercial use

The Uno keeps your workspace simple, your software quick to respond, and your team focused on the job rather than the hardware.
