Your workspace, simplified and strengthened.

The Thinvent Uno is an all-in-one computer built for people who want a tidy desk and dependable everyday performance. With the display, speakers and camera housed in a single unit, there is no tower to find room for and no cable clutter to manage. You get a clean, uncluttered workspace that is ready the moment you switch it on.

Powered by an AMD Ryzen 5 processor, the Uno handles the demands of modern work without hesitation. Whether you are running point-of-sale software, managing inventory, supporting a reception desk, or working through a full day of office applications, it responds quickly and keeps pace with you.

Here is why the Uno earns its place on your desk

- A single integrated unit means less hardware to buy, install and maintain, which keeps your setup simple and your costs predictable.

- The 23.8 inch full high definition screen with wide viewing angles stays clear and comfortable from almost any position, ideal for shared counters and collaborative spaces.
- The pop up camera keeps video calls ready when you need them and out of sight when you do not.
- The height adjustable stand lets each user set the screen exactly where it suits them, supporting better posture through long shifts.
- Windows 11 IoT Enterprise LTSC 2024 Value provides a stable, long term platform, so your systems stay consistent and updates stay manageable.
- Built with an aluminium alloy and steel housing and a Kensington lock, the Uno is made to sit securely in busy public facing environments.

For businesses that value reliability, simplicity and a professional looking front desk, the Thinvent Uno is the practical choice.
