A tidy all-in-one that keeps your desk clear and your day moving.

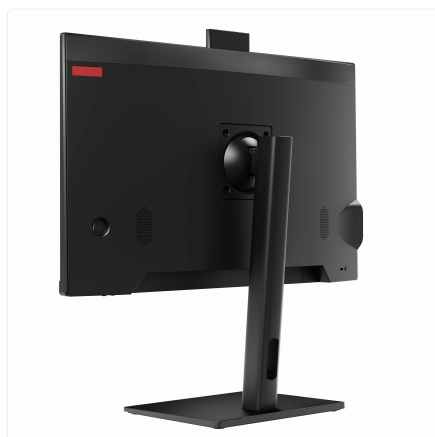

The Thinvent Uno brings the whole computer into the screen, so there is no tower under the desk and no cable spaghetti behind it. One power lead, one clean workspace, and you are ready to work.

Why it earns its place

- The AMD Ryzen 5 7530U processor with six cores responds quickly to everyday work, so spreadsheets, browsers and business apps open without the wait.
- The 23.8 inch full high definition display gives you room to spread out documents side by side, with wide viewing angles that keep the picture clear from wherever you sit.
- The height adjustable stand lets you set the screen at the level that suits your posture, which matters over a long working day.

- A pop up camera keeps video calls ready when you need them and out of sight when you do not.
- Dual band WiFi and gigabit Ethernet keep you connected in the office, at a branch counter or on a shop floor.
- Built in speakers and a full set of ports mean you can add a second screen, a headset or peripherals without hunting for adapters.
- The aluminium alloy and steel housing is made for busy environments, and a Kensington lock helps keep the unit where it belongs.

For front desks, clinics, showrooms, classrooms and back offices, the Uno is a simple, dependable choice. Fewer parts, less clutter, one machine that simply gets on with the job.
