

# Thinvent Micro 2

## Zero Client

For powerful  
Performance

Thinvent's Micro 2 thin client is an energy-efficient, entry-level thin client with a small desktop footprint. The Micro 2 comes with full USB and audio peripheral connectivity, dual display ports capable of a maximum screen resolution of 1920 x 1080.

Micro 2 is a low powered computer that (strictly speaking) does not have a storage device. Since there is no storage drive, there is also no operating system. Since this is a low powered system, all processing is done on the server instead of the thin client itself.

Micro 2 comes with an inbuilt VESA mount saves desk space, hassle-free installation of the devices at the backside of the monitor makes the life of your IT department easy.
