

Why Mini PC?

- Cost effective
- Space saving
- Noiseless
- Low power consumption

Smaller sized components keep the costs lower without hurting the performance.

Its overall small size saves a lot of space leading to less cluttered desks/workstations.

It requires no cooling system which eliminates the need for a noisy fan.

Mini PCs are made with components that consume less energy.

About Us!

Founded in 2007, Thinvent is known for making rugged computers that are low cost and reliable. We serve industries such as manufacturing, banking, transport and education.

Thinvent Mini PC

Know more about some of our hottest selling Mini PCs such as the *Micro 6* and *Neo R*.

Micro 6

- Processor ARM Cortex A55 Quad core 1.91GHz
- Memory 4 GB RAM
- Storage 64 GB eMMC, expandable

Neo R

- Processor Intel J4125 Quad Core
- Memory 4 GB or 8 GB DDR4
- Storage 64 GB eMMC, expandable

Our customers live half their lives online. They need to always be connected. So we built a computer that is small, lightweight and energy efficient like a smartphone. It has the processing power of a high end smartphone, with 4K graphics and flawless audio. But it costs less than the cheapest smartphones in the market.

The Thinvent Neo R mini PC is a true all rounder. Whether you want to work, play or create - it is always ready to deliver. Powered by an Intel Quad Core processor running at up to 2.70 GHz, an M.2 SSD and DDR4 memory for blazing fast performance.
